

Vaccines: What to Expect

Thank you for attending Midland Humane Coalition's Shot & Microchip Clinic. It is common for some pets to experience the following side effects after receiving a vaccine. If these last for more than 1-2 days, or cause your pet significant discomfort, it is important for you to contact your veterinarian:

- * Discomfort & local swelling at the vaccination site
- * Mild fever
- * Decreased appetite & activity

Serious, less common side effects, may occur within minutes to hours after vaccination. These reactions can be life-threatening & are medical emergencies. Call your veterinarian immediately if any of these signs develop:

- * Persistent vomiting or diarrhea
- * Itchy skin that may seem bumpy ("hives")
- * Swelling of muzzle & around face, neck, or eyes
- * Severe coughing or difficulty breathing

Vaccine Schedule: Dogs & Puppies

Contact a veterinarian to schedule your pup's next set of shots. Dogs & puppies, are not protected until 2 WEEKS AFTER they have completed all shots & boosters, & SHOULD NOT be taken into PUBLIC until then.

PUPPIES: Start Puppy Shots as early as 6 weeks or once when fully weaned.

Set 1 - DAPPv+L4

Set 2 (+2 weeks) - DAPPv+L4 Booster

Set 3 (min age 12 weeks) (+2 weeks) - DAPPv+L4 & Intra-Trac 3 Boosters

Set 4 (min age 4 months) (+1 month) - DAPPv+L4, Intra-Trac 3, & Rabies

DOGS:

- * DAPPv+L4, Intra-Trac 3, & Rabies (to be given yearly in adult dogs)
- * Dogs (+1 month) - DAPPv+L4 & Intra-Trac 3 Booster (Dogs which have not been regularly vaccinated or are receiving their vaccinations for the first time will need a booster one month from receiving vaccines.)

Vaccine Schedule: Cats & Kittens

Contact a veterinarian to schedule your kitty's next set of shots. Cats & kittens are not protected until 2 WEEKS AFTER they have completed all shots & boosters, & SHOULD NOT be allowed into PUBLIC until then.

KITTENS

* Set 1 (once weaned) - FVRCP+FELV

* Set 2 (+2 weeks) - FVRCP+FELV Booster

* Set 3 (+2 weeks) - FVRCP+FELV Booster

* Set 4 (min age 4 months) (+1 month) - FVRCP+FELV & Rabies

CATS

* FVRCP+FELV & Rabies (to be given yearly in adult cats)

* Cats (+1 month) - FVRCP+FELV Booster (Cats which have not been regularly vaccinated or are receiving their vaccinations for the first time will need a booster one month from receiving vaccines.)

Educate the public about pet health
Adopt finding homes for adoptable dogs & cats
Connect owners with resources

Thank you for attending Midland Humane Coalition's Shot & Microchip Clinic. We know that vaccinations are difficult to keep up with and can be expensive. That's why we are dedicated connecting you to the resources you need to keep your pet healthy.

We have included your pet's shot records, please take this with you to future vet appointments and shot clinics. If this was your pet's first set of shots, or if your pet has not been regularly vaccinated, they will need a booster of the shots they received within one month to be fully protected – please contact your veterinarian to schedule this appointment.

As you probably already know, there are not enough homes for all of the accidental and even planned litters of puppies & kittens in our community. Last year alone, there were over 2,480 dogs and cats euthanized in Midland– that's over 200 pets per month. In order to combat the unnecessary euthanization of these adoptable, but undervalued puppies and kittens, please spay &/or neuter your pet(s).

To help with the cost of spaying/neutering your pet, the **City of Midland offers a \$70 voucher** to all citizens who live within the city limits. Please call Midland Animal Services at 432-685-7420 or visit <http://www.midlandtexas.gov/258/Spay-Neuter-Voucher-Requirements> for more information on how to receive this valuable offer.
